ECU-SF and EXH-SF Low Lift Pallet Trucks with Driver's Stand-on Platform
Detailed Photos

Always available: sufficient energy for long operating times and the possibility to change batteries

All-round safety: optional side guards can be easily and quickly lowered, keeping drivers safe and stable while providing optimal protection in all driving situations¹

Ergonomic and intuitive operation: driving, lifting and steering processes can be controlled single-handedly by either left- or right-handed operators¹

Effective material handling: up to 2,000 kg lifting capacity and a maximum speed of 7.5 km/h¹

Up to 2,500 kg lifting capacity and an impressive top speed of 14 km/h²

Adjustable side arms and air-sprung stand-on platform adjustable to individual driver weight²

The innovative battery plug lock enables fast battery replacement, without the risk of jamming²

The colour display with language-independent symbols shows all of the important functions at a glance²

EXH-SF and EXH-S Low Lift Pallet Trucks with Driver's Stand-on Platform
Detailed Photos

Optimum view of the fork tips allows a high and safe handling performance²

Increased operational hours thanks to fast interim charging with optional STILL Li-ion technology²

Powerful on ramps: slanted chassis design enables powerful driving on ramps³

A variety of access options and a stand-on platform cushioning that can be adjusted by rocker switch (+/-)³

Rear access for extra safety when loading and unloading, and when driving up ramps³

Side access for longer transport distances³

Backrest for frequent order picking, also optionally for all models an individually adjustable, air cushioned stand-on platform³

Thanks to the height-adjustable STILL Easy Drive steering wheel, all functions can be operated with ergonomic controls by right- and left-handed operators without changing grip³

² Here e.g. EXH-SF // ³ Here e.g. EXH-S

ECU-SF and EXH-SF Low Lift Pallet Trucks with Driver's Stand-on Platform Swift and Compact

High pallet reloading rate: compact size for quick and safe operation

Perfect ergonomics: easy entry and exit thanks to the only 170 mm high stand-on platform

Fast and safe: optional side guards can be opened and closed using just one hand

ECU-SF

The powerful ECU-SF low lift pallet truck by STILL features a hinged platform and a load capacity of 2,000 kg, making it the ideal choice for loading and unloading lorries and for transporting goods horizontally. This compact warehouse helper can be manoeuvred accurately and safely in narrow spaces. Its rounded forks can be easily threaded into pallets. This low-maintenance truck gets the job done reliably, from lightweight jobs over multiple shifts in the industrial sector to handling material in retail environments.

The chassis is covered with shock-resistant plastic, providing the robust truck with outstanding protection in harsh environments. With a height of only 170 mm, the platform of the ECU-SF is very low. This enables operators to quickly and safely get on and off the stand-on platform. The precise and intuitive electrical steering unit minimises operator fatigue and enables goods to be turned around fast. The optional side bars can be opened and closed using only one hand, keeping the driver stable and safe in any driving situation.

Superb handling performance: a top speed of 14 km/h and a maximum lifting capacity of 2,500 kg

Back-friendly: air-cushioned stand-on platform adjustable to individual weight with adjustable side arms

Powerful driving on ramps: hydraulically sprung support wheels for best traction

EXH-SF

Speed, ergonomics, compact design – the EXH-SF pallet truck with a hinged stand-on platform is the perfect combination of all these qualities. With a maximum lifting capacity of 2,500 kg and an impressive top speed of 14 km/h, the EXH-SF demonstrates superior handling power. The air-cushioned stand-on platform with integrated compressor keeps work back-friendly at all times. Due to its sprung support wheels the smart warehouse organiser crosses ramps comfortably, safely and with optimum traction. Furthermore,

the EXH-SF helps to save valuable warehouse space: with a total width of just 720 mm, the pallet truck is narrower than a Europallet and can be manoeuvred precisely through the narrowest of aisles. Do you need a truck that is operational 24 hours a day? With the STILL Li-ion technology, even the shortest breaks are sufficient to charge the EXH-SF. As different battery sizes are available depending on your individual needs, any customer requirement as well as multi-shift operations can be realised.

EXH-S Low Lift Pallet Truck with Driver's Stand-on Platform Speeds things up. Safely.

Ergonomic back protection thanks to individually adjustable air-cushioned driver's stand-on platform

High and flexible handling capacity: a maximum speed of 14 km/h and a lifting capacity of 2,500 kg

Safe handling in confined spaces thanks to a chassis that is only 720 mm narrow

Intuitive operating concept: height-adjustable STILL Easy Drive steering wheel provides easy-access control without having to change to grip

EXH-S

Efficient performance, safe and convenient operation, reliable flexibility – the EXH-S pallet truck combines all of these features to perfection. With a maximum lifting capacity of 2,500 kg, a swift top speed of 14 km/h and the ability to move two pallets at once thanks to the extra-long forks, the EXH-S features unrivalled performance. Thanks to the intuitive operating concept, you can rely on the height-adjustable STILL Easy Drive steering wheel with integrated display and rocker switches at all times. This feature ensures that left- and right-handed operators always have full control of all functions, without having

to change grip. The optional, individually adjustable, air-cushioned stand-on platform also provides optimal protection for the operator's back, even in the toughest applications. Speaking of applications, the EXH-S equips you for any storage situation and ensures you benefit from flexibility when it comes to configuration variants. All truck variants have an ultra-robust chassis. This provides extra protection for demanding ramp applications, for example. Those who choose the lithium-ion variant as an option can interim charge the battery at any time and benefit from maximum flexibility.

Simply easy

- Smooth steering and intuitive operation of all functions for left- and right-handed operators with STILL Easy Drive steering wheel
- Easy access and optimal protection for the operator's back and joints: low access point and adjustable, air-cushioned stand-on platform with integrated compressor available as an option
- Optional built-in charger for decentralised charging at every power socket
- Optimal utilisation of storage space: compact dimensions and high manoeuvrability facilitate narrow working aisles

Simply powerful

- Fast goods handling: up to 2,500 kg lifting capacity and an optional maximum speed of 14 km/h for the EXH-S 25
- Built for continuous operation: reliable and low-maintenance drive
- Swift, safe movement on ramps: high-powered drive and lift motor and 5-wheel chassis with sprung support wheels
- Instant charging: lithium-ion model achieves 50 percent charge level in only 30 minutes and is fully charged in only 90 minutes
- Withstands even the toughest applications: robust, durable chassis made from solid steel

Simply safe

- Simply work with precision thanks to unobstructed field of vision: free view mast and centrally positioned tiller
- Accidental roll-back impossible: automatic stop function even on ramps
- Fast and safe cornering: Curve Speed Control automatically adapts speed to the steering angle when cornering
- Only moves off once the operator is standing safely: optional foot sensor determines whether the feet are within the truck's contour
- Safe load handling in confined spaces thanks to compact dimensions

Simply flexible

- Suitable driving programmes for any application, from maximum handling power to optimal efficiency: ECO, BOOST or Blue-Q
- Ready for use at all times: battery capacities up to 500 Ah and optional STILL lithium-ion battery for round-the-clock availability
- Decentralised and flexible charging at any power socket with the optional built-in charger
- Flexibly configurable driver's cab for various main applications, from frequent ramp driving through to long transport distances: rear access, side access or backrest

Simply connected

- Versatile, flexible access control with FleetManager 4.x
- Fast service analysis and parametrisation of settings thanks to CAN bus interface
- Easy integration into material flow management system thanks to MMS provision
